INTERNATIONAL INNOVATIONS ORIENTATION

## Introduction sheet: Moekotte groep

The Moekotte Engineering and Installation Group established in Enschede in 1966. By now, the Moekotte Group, with branches in Enschede, Hengelo (O), Apeldoorn, Veendam and Münster (Germany), has become a major player in the field of industrial automation, panel and module construction and electrical engineering.

The customer-friendly attitude of the approximately 250 employees, distributed across the four branches, has contributed to the company's impressive growth in recent years. In addition, customisation, quality and flexibility are the well-known leitmotifs that also contribute to this success. It goes without saying that during the implementation of all three of the aforementioned disciplines, including indirect activities such as purchasing and sales, we strictly adhere to the Moekotte environmental policy, which has also recently resulted in us being awarded ISO 14001 certification!

Customers include leading companies in a wide range of industries: from the environment to chemicals and from paper to food and pharmaceuticals, water boards and utilities.

### Binding in vision

In Moekotte's vision, technology, in all its diversity, is not a goal but a means in the service of our society. Smart, sustainable and affordable technical solutions increase the comfort and pleasure of life and work for citizens, companies and organisations alike. In line with this vision, Moekotte not only continuously updates its knowledge, but also shares it with relevant parties. In other words: multiplying by sharing. In the vision of Moekotte, collaboration is therefore the key to allowing both engineering and technical solutions to play a value-added role within all sections of the society.

**THE INNOVATIVE STANDARD IN CUSTOMISATION, QUALITY, FLEXIBILITY AND SUSTAINABILITY**
