INTERNATIONAL INNOVATIONS ORIENTATION

## Introduction sheet: Hencon

The Hencon Group sets new standards in the market in engineering, manufacturing and servicing of reliable special and custom made mobile equipment for the aluminium industry, mining industry and forestry industry. Our organization and employees focus on flexibility, high quality standards and customer satisfaction.

### We offer solutions for:

- Potrooms
- Casthouses
- Mining industry
- Vacuum needs
- Forestry

### Dutch standards

Hencon is a Dutch company, with sound Dutch core values. The Dutch are pioneers, always looking for even smarter, safer and faster ways of doing things. From the very outset, Hencon has stood for excellent quality, flexibility, high standards and customer satisfaction. Advantages that make Hencon a highly valued international player in the aluminium and mining industries.

### More than just a machine supplier

We understand better than anyone what types of machine you require and how many you might need. Not only can we recommend an effective solution, we can also simulate your actual situation and status by using a digital application to clearly identify your bottlenecks. Together, we can develop a new, durable set-up without bugs, helping you attain higher output levels.

### Future proof

Technology is changing fast. At Hencon, we develop new, state-of-the-art solutions to help future-proof your processes. One example is our automated guided vehicle which has no need for a driver. The development of electrically-driven, zero-emission equipment is also a high priority. Our customers value our distinctive, innovative drive and benefit from inspiring opportunities for greater performance, sustainability and job satisfaction.

In view of the energy transitions and our innovative company character, in combination with the solutions we want to develop, we are exploring the possibilities of hydrogen and ethanol fuel cells.
