INTERNATIONAL INNOVATIONS ORIENTATION

Introduction sheet: Hollander Techniek

About us

As a technical integrator, we offer you plenty of surprising opportunities within this new economy. By means of innovations and collaboration, we create complete solutions which give an added value to your activities. Experience our range of services and techniques which you can combine endlessly. We stand for integral collaboration and the connection which ensures that the solution works

Pioneering work is a continual process which never ends. With our integral technical solutions in our specialisms of electrical engineering, mechanical engineering, security, swimming pool technology, IT, robotization, industrial automation, and shop automation.

Markets

In our society, technology does not form an obstacle. It is technology which ensures that we can live, work and recreate in a comfortable and safe way. Hollander Techniek operates in three market segments; Utility , Industry and Retail. From these market segments we help you with development of new and existing buildings , process optimization , and various store solutions.

Innovation

It is only thanks to innovation that the Dutch manufacturing industry is able to take on the competition from abroad. As a knowledge company, we have many specialisms available. However, we have an open character, above all. Our strengths are collaborating with partners and being open to new ideas. In this way, we ensure an optimal end result, no matter what the customer requires.

The energy transition to other kind of power systems for heating, mobility, industrial power, also leads to new chances we have to bring the knowledge in our company to extend our capability as total service supplier and integrator.
