

## Introduction sheet: Scape Technologies

### FLEXIBLE STANDARDIZED BIN-PICKING SOLUTION FOR REPEATABLE TASK-BASED JOBS

**Scape Technologies**, known as Scape – The Bin-Picking Company, is a Danish software automation company and the most experienced supplier in the challenging field of Bin-Picking. Handling randomly placed parts from a bin by means of a robot is our core competence and what makes us the **world market leader in Bin-Picking**.

Scape is driven by a dedicated and innovative mindset throughout the entire organization and a will to solve a well-known challenge in production environments worldwide. Our success in developing and implementing standardized solutions allows easy adaption to each customer's special requirements. Since 2011 more than 80 standardized SCAPE Bin-Picking solutions are implemented and in full production at several customers all over Europe. And that is only the beginning.

SCAPE Bin-Picker Solutions give manufacturers access to all the benefits of advanced robotic automation with a standardized and highly reliable Bin-Picking Software, that makes automation affordable for both SME with small-batch production runs and LME with large mixed product assembly.

Repeatable task-based jobs like bin-picking and quality control can be done by cost-effective, flexible and standardized SCAPE Bin-Picker systems, which is a safe automation solution for a wide range of bin-picking tasks and it can be done with higher accuracy than humans - 24/7.
